

Skin Essentials

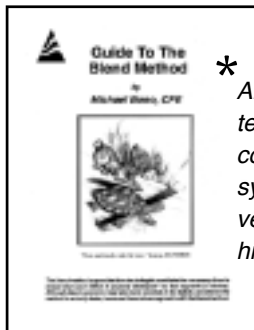

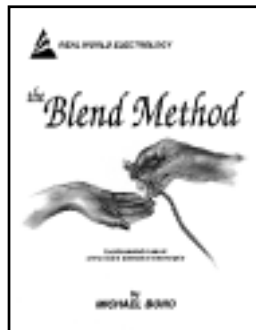

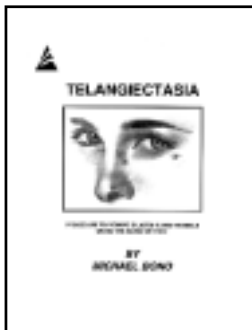

Michael Bono*

- Permanent Results: *Guaranteed!*
- Electrolysis: Safe and Medically Approved.
- Michael: 32 years practicing in Santa Barbara.

Skin Essentials offers permanent hair removal for the underarms. This treatment is electrolysis; not laser. (Laser is not permanent for most people.) You will have 4 treatment sessions and a few quick “follow-ups” *and then never have underarm hair again — forever — for the rest of your life. Really!*

There is virtually no pain with this treatment; local anesthetic is used (medically supervised). We charge a onetime fee of \$850. Consultations are free with Michael; he can answer all your questions so you can decide if this procedure is right for you.

*

An authority in the field of electrology, Michael has written textbooks for aesthetics and medicine and lectured in many countries. He invented several procedures, including the system used at Skin Essentials for the removal of “spider veins.” Michael is well known in our community and comes highly recommended by several local Plastic Surgeons.
